## PROGRAMME REPORT

The National seminar (online) on Methodology and Data Analysis in Research was organized by the Department of Commerce on 16-05-2020. The first technical session was conducted by Dr. Hareesh N Ramanathan on the topic 'Sampling of data' and the second session by Dr. Sreejith S on the topic 'An overview of empirical data analysis.

In the first session of the seminar, the resource person discussed various aspects of sampling such as methods, techniques and cautions to be taken while conducting sampling. Dr. Harish Ramanathan explained the sampling methodology such as sampling methods, sample bias, sample size etc. The resource person has also emphasized that careful consideration of the sampling method is essential to ensure that the results obtained from the sample are applicable to the broader population, increasing the overall validity and reliability of research findings.

Dr. Sreejith S in his technical session shed light on the various aspects of empirical data analysis. The resource person highlighted the importance of data analysis as it is a fundamental step in scientific research and is used to draw meaningful conclusions, test hypotheses, identify patterns, and make evidence-based decisions. He has discussed the various steps such as data collection, cleaning of data and preprocessing, exploring the collected data, hypothesis testing, statistical analysis, visualization, interpretation. He has also mentioned the importance of validation and reliability through various statistical methods and also explained the ways for proper documentation and reporting of data.
