PROGRAMME REPORT

The workshop on Intellectual Property Rights for students and Faculty was held on 11-06-2021 in online mode with the aim to provide an overview of Intellectual Property Rights, its importance and how they can be protected. The primary aim was to educate participants about the definition, types, and significance of IPR, and to impart knowledge on how these rights can be effectively protected.

Dr. Anson C J, Assistant Professor, Interuniversity Centre for IPR Studies (IUCIPRS) was the resource person. The resource person explained in detail about the definition of IPR, types of IPR and the importance of protecting intellectual property rights. Dr. Anson commenced the workshop by offering a comprehensive definition of Intellectual Property Rights.

He elucidated the various types of IPR, including patents, trademarks, and copyrights, providing a foundational understanding for participants. The resource person has also provided an overview of the various laws and regulations that govern intellectual property rights including the laws involved in patents, trademarks and copyrights. A pivotal component of the workshop was the interactive question and answer session. Participants were given the opportunity to pose questions and seek clarifications from the resource person. This fostered engagement and allowed for a deeper exploration of specific topics relevant to the audience.

The workshop served as a valuable platform for students and faculty to enhance their understanding of Intellectual Property Rights and how it is helpful in protecting their innovative ideas or creations. Dr. Anson C J's expertise and the interactive nature of the session ensured that participants left with not only theoretical knowledge but also practical insights into the protection and importance of intellectual property in various domains.
