## M.Sc. COMPUTER SCIENCE WITH DATA ANALYTICS

The Master's programme in **Computer Science with specialization in Data Analytics** aims to combine a scientific mind set with specialist technical knowledge, enabling graduates to analyse, design, validate and implement state-of-the-art ICT systems in their operational context. It is a broad-based program that covers concepts from engineering, science and business with the aim of producing high-quality software professionals. The program focuses on developing advanced skills in data analysis, covering statistical methods, machine learning, and data mining techniques. Students learn to create meaningful visualizations that help in conveying complex insights to non-technical stakeholders, an essential skill in the field.

## B.Voc Course

Sree Sankara Vidyapeetom College is delighted to introduce our Bachelor of Vocation (B.Voc) program in **Tourism and Hospitality Management**, designed to empower aspiring professionals with the skills and knowledge needed to thrive in the dynamic and exciting industry of hospitality.

At SSV College, we understand the significance of tourism and hospitality in today's global economy. Our B.Voc program is carefully crafted to provide students with a comprehensive understanding of the industry, blending theoretical knowledge with practical experiences. As we believe in a holistic approach to education, our curriculum emphasizes not only academic excellence but also hands-on training, industry exposure, and the development of essential soft skills. Our curriculum is curated in collaboration with industry experts, ensuring that students acquire the latest knowledge and skills demanded by the ever-evolving tourism and hospitality sector. We believe in learning by doing. Through internships, field trips, and real-world projects, our students gain valuable practical experience that prepares them for the challenges of the industry. Opting for a B. Voc. over traditional degree programs offers a significant advantage as candidates have various points to exit the program and consistent exposure to the industry. Even if a student cannot finish the full 3-year program, they still receive a diploma and an advanced diploma upon completing the first and second years, respectively. Consequently, the knowledge and skills acquired are recognized at every stage, making the individual eligible for employment based on market demands.
